toxiWEB® Overview

Getting Started · https://toxicalldemo.com/docs/tox5/toxiweb-overview/

toxiWEB® Hosted

Modern poison exposure data collection — accessible anywhere, starting free

toxiWEB® Hosted is a secure, browser-based platform designed for poison centers, toxicology programs, and public-health initiatives worldwide.

Start with a **Free individual account**, expand to **organization-level collaboration**, and grow into **regional or national analytics** — all without servers, local installation, or startup costs.

No infrastructure. No mandatory onboarding fees. No upfront commitment.

Built for Global Programs — From First Steps to National Impact

toxiWEB® Hosted was created to support organizations at every stage of maturity:

- Emerging poison centers
- Ministries of Health
- University and academic toxicology programs
- NGO and WHO-aligned surveillance initiatives

- Research and monitoring projects
- Regions without an existing national poison database

Whether you are piloting a new program or scaling toward regional coordination, toxiWEB® Hosted meets you where you are — and grows with you.

What You Can Do with toxiWEB® Hosted

From day one, toxiWEB® Hosted delivers real, production-ready capability:

- Record and review poison exposure cases
- Capture standardized exposure and outcome data
- Search, filter, and analyze cases
- Generate dashboards and reports
- Support surveillance, education, and research
- Access securely from anywhere with a browser

No software installs.
No VPNs.
No local IT burden.

Start Free — With No Time Limits

The Free tier is intentionally useful

This is **not a demo** and **not a trial**.

The Free tier allows individuals to:

- Enter and review real cases
- Learn standardized toxicology workflows
- Support education and evaluation
- Explore the platform without risk

Free means free — no credit card required.

Designed Around De-Identified Data

Enabling accessibility, sustainability, and global deployment

toxiWEB® Hosted is intentionally designed around **de-identified data workflows**. This approach:

- Enables affordable global SaaS pricing
- Reduces regulatory complexity across countries
- Minimizes legal and operational risk
- Allows rapid onboarding and deployment
- Aligns with surveillance, research, and public-health use cases

By avoiding patient-identifiable data, toxiWEB® Hosted delivers a secure, scalable platform that more organizations can adopt and sustain.

> Programs requiring patient-identifiable (PHI) workflows may choose Enterprise or self-hosted deployment options.

Hosted Tiers That Grow With You

toxiWEB® Hosted offers simple, transparent tiers designed to evolve with your program.

No per-seat licensing.
No startup or mandatory onboarding fees.
Upgrade only when your needs expand.

Free

Individual access — always free

- 1 named user
- Individual workspace
- Core case entry and review
- Standardized exposure and outcome data
- Basic search and filtering
- Summary dashboards
- Secure hosted access
- **Data exports: None**

Starter — $199 / month

Organization access for small teams

(Billed monthly)

- Up to 5 named users
- Shared organizational workspace
- Saved searches and shared filters
- Expanded reporting
- Organization-level management
- Self-service onboarding
- **Data exports: Basic**

Professional — Annual Subscription

Operational teams and routine reporting

(Billed annually)

- $749 / month, billed annually
- Up to 15 named users
- Advanced reporting and filtering
- Enhanced case analytics

- Scheduled and recurring reports
- Priority support
- **Data exports: Enhanced**

Advanced Analytics — Annual Subscription

Surveillance, trends, and population-level insight

(Billed annually)

- $1,750 / month, billed annually
- Up to 25 named users
- Cross-case and longitudinal analytics
- Trend and outcome analysis
- Research-focused dashboards
- Extended data access and retention
- Advanced visualizations
- **Data exports: Advanced**

Tier Comparison

Feature	Free	Starter	Professional	Advanced Analytics
Named users	1	Up to 5	Up to 15	Up to 25
Individual workspace	✔	✔	✔	✔
Organization workspace	—	✔	✔	✔
Core case entry & review	✔	✔	✔	✔
Standardized data model	✔	✔	✔	✔
Basic search & dashboards	✔	✔	✔	✔
Saved searches & filters	—	✔	✔	✔

Feature	Free	Starter	Professional	Advanced Analytics
Expanded reporting	—	✔	✔	✔
Advanced analytics	—	—	✔	✔
Scheduled reports	—	—	✔	✔
Cross-case trend analysis	—	—	—	✔
Research dashboards	—	—	—	✔
Data exports	—	**Basic**	**Enhanced**	**Advanced**
Billing model	Free	Monthly	Annual	Annual
Startup / onboarding fees	None	None	None	None

Feature availability and tier definitions may change over time as toxiWEB® evolves. Computer Automation Systems (CAS) reserves the right to add, modify, or remove features from any tier as part of ongoing product development.

A Proven Foundation for Regional and National Systems

toxiWEB® and toxiCALL® were foundational technologies behind the creation of the **first near real-time national poison reporting database**, helping establish how poison exposure data could be collected, harmonized, and analyzed at scale.

This work demonstrated that:

- Near real-time poison data can support national surveillance
- Standardized case models enable meaningful aggregation
- Distributed centers can contribute to a unified system
- Timely reporting improves public-health response

That same philosophy continues today.

From Local Programs to Regional and National Insight

A clear path forward — without replacing your platform

Both **toxiWEB® Hosted** and **toxiWEB® Enterprise** are designed to support growth over time:

- Individuals and small programs can start immediately with Hosted
- Organizations can expand to multi-center collaboration
- Regional authorities can coordinate shared data models
- National systems can be deployed using Enterprise or self-hosted architectures

What begins as a single program can evolve into a **regional or national solution** — without restarting, migrating, or replacing the underlying platform.

> Many national poison data systems begin with local programs. toxiWEB® provides the continuity needed to grow from local reporting to national insight.

Evaluation & Procurement Considerations

toxiWEB® Hosted is a purpose-built platform developed exclusively for poison center operations, toxicology workflows, and public-health surveillance.

Because of this highly specialized focus, organizations typically evaluate toxiWEB® directly based on its operational capabilities, rather than through competitive RFP processes designed for general-purpose software systems.

Many organizations choose to proceed using **direct evaluation or sole-source procurement**, particularly when seeking a proven platform with established poison-center expertise and a clear path to regional or national scale.

CAS is available to support evaluation, documentation, and procurement approaches appropriate for specialized public-health systems.

A Path Beyond Hosted

Many organizations begin with **toxiWEB® Hosted** and later expand to **toxiWEB® Enterprise** as governance, scope, and regulatory requirements evolve.

This continuity allows programs to start quickly, standardize workflows, and scale responsibly — without replacing platforms or retraining users.

When Organizations Consider Enterprise

toxiWEB® Enterprise is designed for organizations that require patient-identifiable data, multi-center governance, or national coordination.

Capability	toxiWEB® Hosted	toxiWEB® Enterprise
Intended use	Individuals & organizations	Regional & national systems
Data model	De-identified	Patient-identifiable (PHI capable)
Deployment	CAS-hosted SaaS	On-prem, private, or hybrid
Governance	Organization-level	Multi-center / national
Surveillance	Near real-time (aggregated)	Near real-time (full fidelity)
Integrations	Limited	Extensive / custom
Onboarding	Self-service	Assisted implementation

Learn more about toxiWEB® Enterprise

Built on Proven Poison Center Expertise

toxiWEB® is developed by **Computer Automation Systems (CAS)** — a long-standing partner to poison centers worldwide.

- Over 25 years supporting toxicology workflows
- Designed by and for poison center professionals

- Trusted by international programs
- A long-term platform — not a short-term SaaS experiment

Start small.

Scale confidently.

Stay on one platform.
