This tutorial demonstrates how to perform a Micromedex lookup search in toxiCALL5. You will learn to look up multiple substances simultaneously and transfer information to your notes.

1. Begin Tutorial

This tutorial introduces the process of performing a Micromedex lookup search in toxiCALL 5.

[Begin Tutorial]

2. Explain Lookup Capabilities

For this guide, we will review the new capabilities of performing a Micromedex lookup search in toxiCALL 5. This will allow us to look up multiple substances at one time and even copy information over to our notes. For this demonstration, we'll start with a blank case and just come down and enter the verbatim if.

[Explain Lookup Capabilities]

3. Select Product In Lookup

My lookup source is already entered on the right side. I can just press the Enter key. In my lookup window, I'll find my specific product, then choose select product.

[Select Product In Lookup]

4. Click Select Product

Click the Select Product button to confirm your product choice in the lookup window.

[Click Select Product]

5. View Selected Product

You can see on the right side the selected product is shown.

[View Selected Product]

6. Add Second Product

A new feature in toxiCALL 5 is we can now add a second product. Look for a second product. Then we'll select that product.

[Add Second Product]

7. Click Select Product Again

Click the Select Product button to add the second product to your lookup list.

[Click Select Product Again]

8. Review Multiple Products

Notice now we have two and can add additional products on the right side. Once we've selected all the products we want, we choose accept.

[Review Multiple Products]

9. Click Accept

Click the Accept button to finalize your selection of products for the lookup.

[Click Accept]

10. Import Products To Toxicall

Notice that both products are now brought into Toxicall. We can also look at these products. If you're used to keeping that browser window open, we'll select this new feature which will show product information. Now

[Import Products To Toxicall]

11. Click View

Click the View button to see detailed product information within Toxicall.

[Click View]

12. View Product Information

I can see the information that we saw in Micromedex for all of the products in this case.

[View Product Information]

13. Click Close

Click the Close button to exit the product information view.

[Click Close]

14. Add New Substance Lookup

One additional feature I'll show is adding a new substance. We'll perform our lookup and find something with a little more information. So let's choose this product now.

[Add New Substance Lookup]

15. Highlight Active Ingredients

I can come down to the active ingredients and highlight this information. Right click on the highlighted information and choose notes.

[Highlight Active Ingredients]

16. Push Data To Notes

Notice we also have additional items we can push data back into Toxicall. For this example, I'll use notes. Choose accept.

[Push Data To Notes]

17. Click Accept

Click the Accept button to confirm adding the highlighted information to your notes.

[Click Accept]

18. View New Note Entry

And now you notice we have a new note entry with the information we brought in from Micromedex.

[View New Note Entry]

19. Conclude Tutorial

That concludes this tutorial.

[Conclude Tutorial]

You have successfully performed a Micromedex lookup in toxiCALL 5, including selecting multiple products and adding information to notes. For further learning, explore additional features in Toxicall or advanced lookup options.
