Case Entry Features

Case Entry Layout

Complete flexibility with how cases are viewed. Open multiple cases in tabs or even as floating windows to place on another screen. Resize many elements within the screen layout. Advanced features allow the creation of your layout design by adding, removing, and relocating data collection fields.

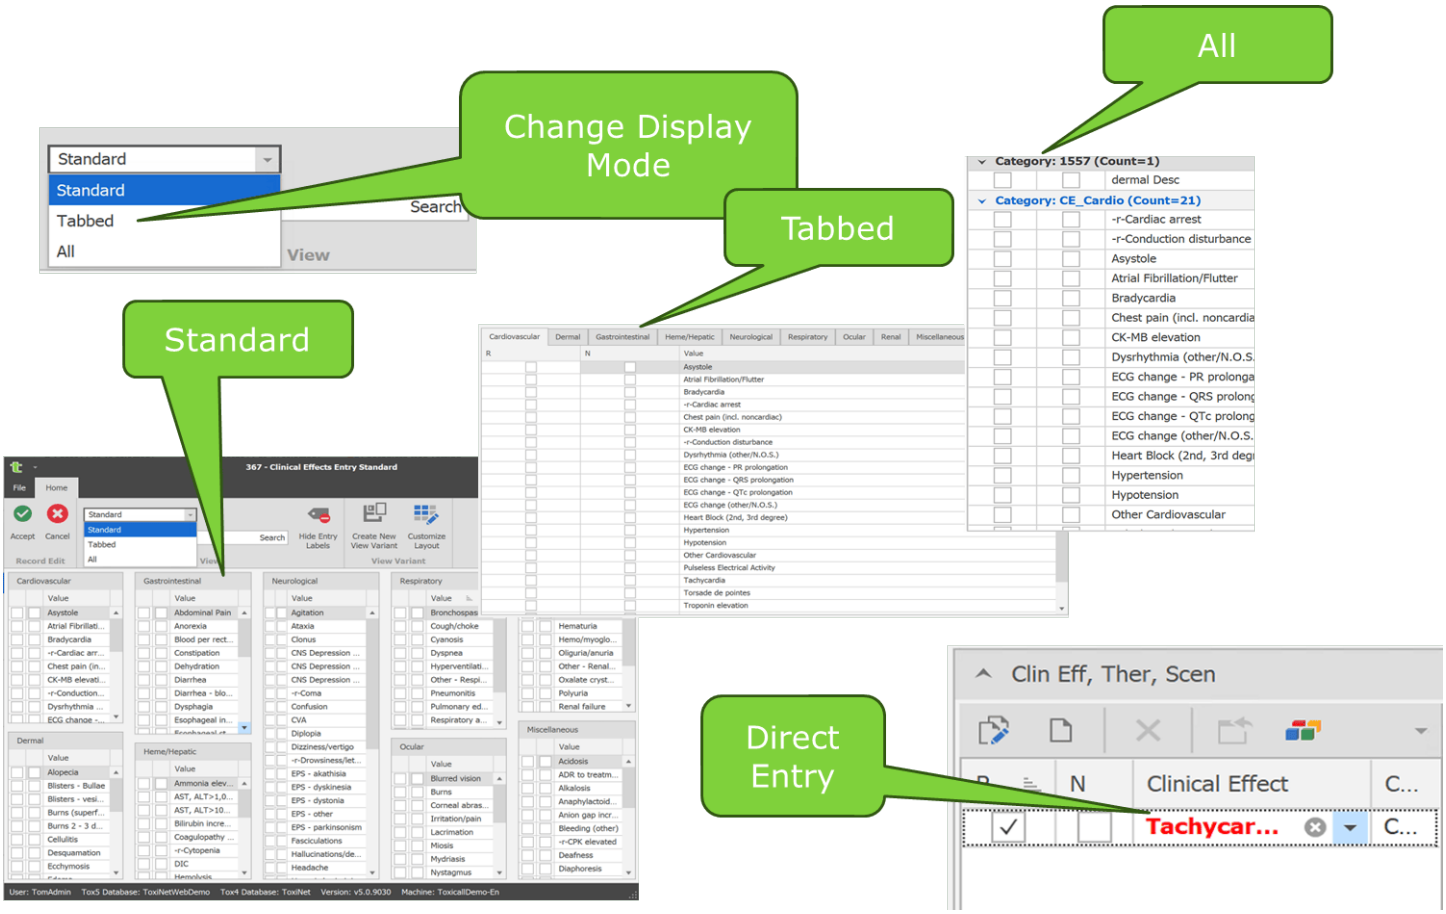

Two Case Entry Layout Variants (squeezed)
Layout Designer: Drag-Drop, resize, add/remove entry fields

Show/Hide Entry Labels

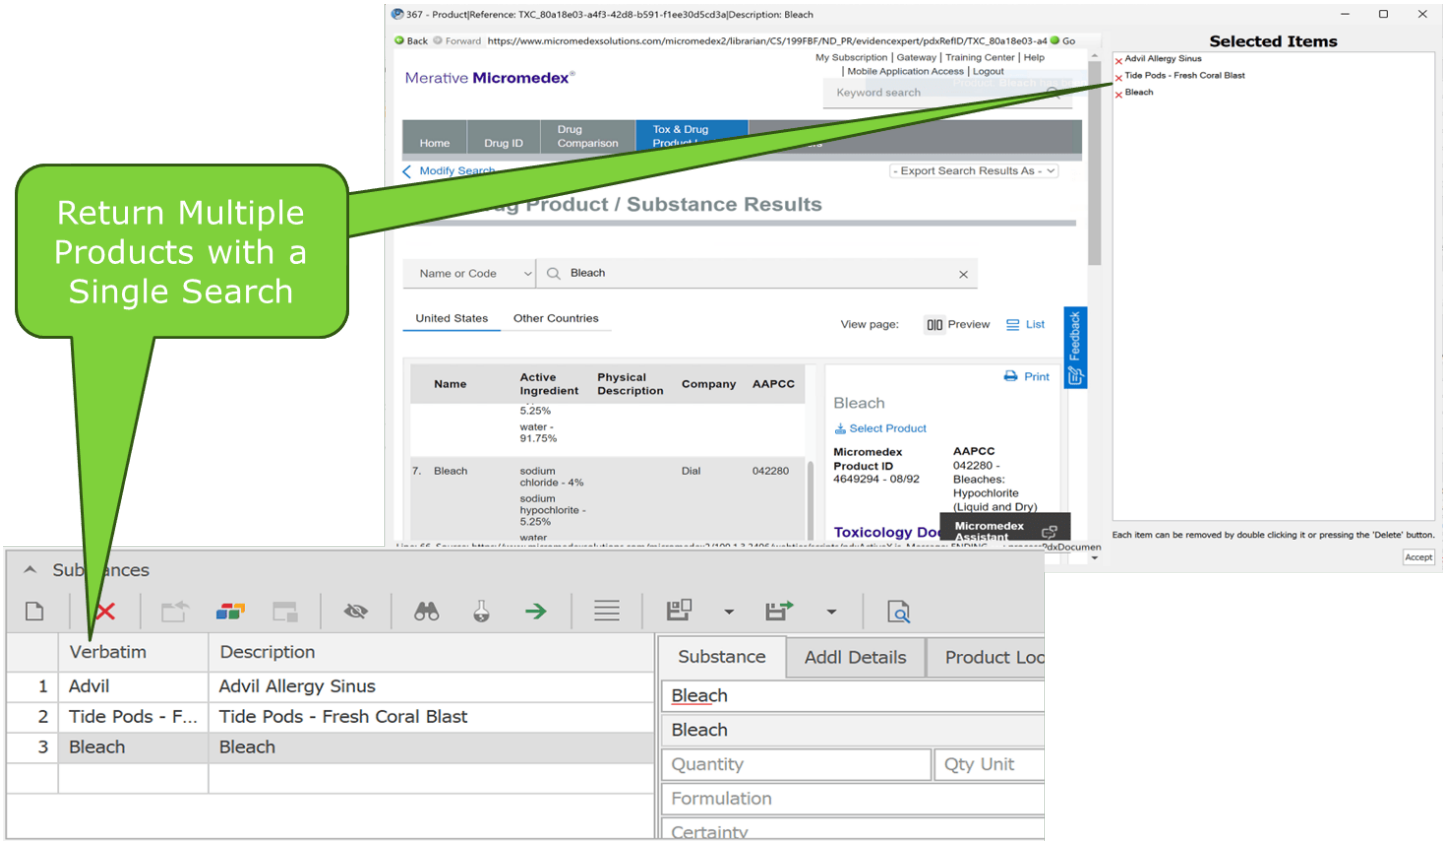

Flexible Entry Modes

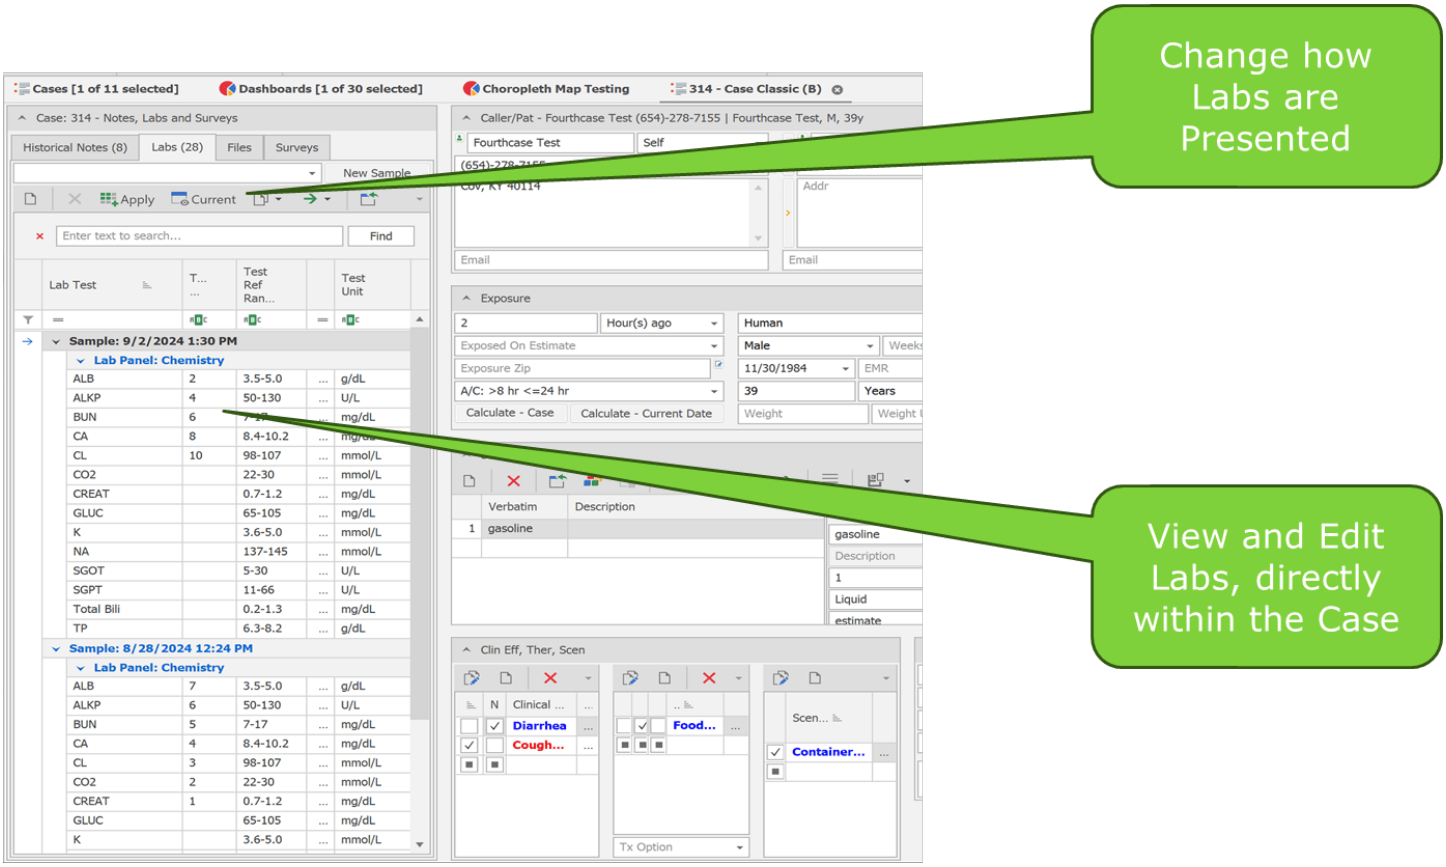

Route, Clinical Effects, Therapies, and Scenarios provide multiple entry/selection modes and search filters. This ensures entry modes are optimized for both new and experienced specialists.
